

Response Summary:

1. Student Information *

First Name	Grace
Last Name	Combs
Major	Web Development
Course (e.g. CGT 270-001)	CGT 270-003
Term (e.g. F2019)	SP2022

2. Email Address *

(University Email Address is required.)

gcombs@purdue.edu

3. Visualization Assignment *

- Homework Assignment

Understand

4. Parse Data: List each field and its data type. Refer to Fry (page 8-9, 2007) for examples of description of different data types (string, float, character, integer), you can also create user defined types (some combination that uniquely identifies data like the Index type in the Fry 2007 page 9 example) *

There are way too many fields to list all of them, but most, if all, are strings .

5. Assumptions: List any assumptions you are making about the data and/or the visualization challenge (aka the project) *

I think the number of black teachers in the 21st century will be more than during W.E.B Du Bois' time.
